## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102~~(a)~~ and (b) as being anticipated by Sturman (US 3313567).

Sturman discloses a blast protection system for protecting an asset from a blast force, the system comprising: a shaft (15); a plurality of plates (19, 20) mounted on the shaft (15); a panel (12) attached to a first plate (via bracket 25) of the plurality of plates (19, 20) and for receiving the blast force and transmitting a portion of the blast force to the first plate; and a base (13, 11) attached to a second plate of the plurality of the plates and for receiving a portion of the force transmitted to the first plate by the panel, wherein the force received by the base is less than the blast force.

With respect to claim 2, wherein the plates have a concave side and a convex side (19, 20) and (col. 2, lines 45-58).

With respect to claim 3, wherein the plates are disks (19, 20) and (col. 2, lines 45-58).

With respect to claim 4, wherein the plates are Belleville springs (19, 20) and (col. 2, lines 45-58).

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure regarding the usage of belleville springs and shock absorbing panels to protect against bomb blasts. (see attached form PTO-892)
